Table 4 Effect of date of pinching on yield per plant (kg) and yield per hectare (mt/ha) of cucumber (*Cucumis sativus* L. cv. Kamini) at Kawasoti, Nepal (2024)

Treatment	Yield per plant (kg)	Yield per hectare (mt/ha)
Pinching at 15 days	5.20^{ab}	42.82^{a}
Pinching at 20 days	5.77^{a}	46.14^{a}
Pinching at 25 days	4.58^{bc}	36.58^{b}
Pinching at 30 days	4.25^{cd}	34.76^{b}
Control	3.79^{d}	30.54^{b}
Grand mean	4.71	38.16
SEM (±)	0.26	2.20
LSD (0.05)	0.71	5.89
CV (%)	9.71	9.64
F- test	***	***

Note: Means followed by common letter(s) within column are non-significantly different based on DMRT at P=0.05; LSD, Least Significant Difference; SEM, Standard Error of Mean; CV, Coefficient of Variation; DAT, Days After Transplanting; *** significant at 0.1% level of significance
